

Industrial optimization
and insurance solutions
that boost client's margins

 Inrobin

About us

Vision

Inrobin provides a platform to manage risk of heavy industry companies and offer real-time insurance solutions to fully profit from the capabilities of IIoT

Industrial analytics

Our ML is able to detect the factors which are on the heart of the faults or failures. Inrobin helps customers by providing the % of impact of the relevant factors as well as informing on how they impact (e.g. risky or protective).

We provide future predictions as preventing risks or abnormal behaviors is an important task that helps customers to reduce costs, improve benefits and in the worst case, change machinery.

- Significant variables hierarchization
- Time series prediction
- Multi-user account
- Data visualization graphs
- Customized performance reports
- Asset breakdown alerts
- Notification of alerts
- Insurance underwriting
- Insurance contracting functionality
- Insurance policy storage
- Intuitive insurance policy manager
- Quarterly policy check-up
- Risk adjusted premium

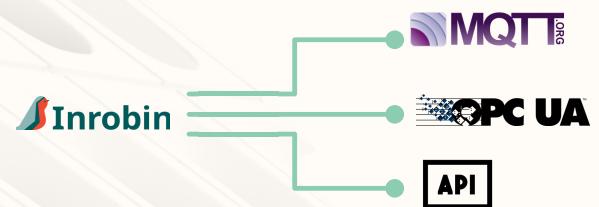

How it works?

Sign up – BETA

Sign up for the BETA version and enjoy predictive analysis of your industrial assets. Introduce your company info and process data to get an insurance quote.

IIoT technology

We aim at being at intersection between industry and insurance, and for that reason we will be able to offer a wide spectrum of connectivity. To say: MQTT, OPC UA, OPC DA, Modbus, BACnet, Ethernet IP, Allen Bradley and MT Connect

How to find us

Send us an email to hello@inrobin.com and we will schedule a call with your insurance or engineering team.
