

Industrial optimization  
and insurance solutions  
that boost client's margins

 Inrobin

# About us

## Vision

Inrobin offers a platform to manage risk of heavy industry companies and offer real-time insurance solutions to fully profit from the capabilities of IIoT.

## Industrial insurtech

Our platform gathers industrial process data to help insurance companies underwrite their customers' risks.

Our underwriting is updated in a real-time basis feeding the ML and risk models that estimate future premiums based on the customers' performance.

By detecting abnormal behaviors we allow both insurers and manufacturers tackle together the risks that affect their business.

- Data protection compliance
- Multi-user account
- Customer's insurance data visualization
- Customized client profitability reports
- Insurance underwriting
- Insurance contracting functionality
- Customers' policy organization
- Intuitive insurance policy manager
- Quarterly policy check-up
- Risk adjusted premium

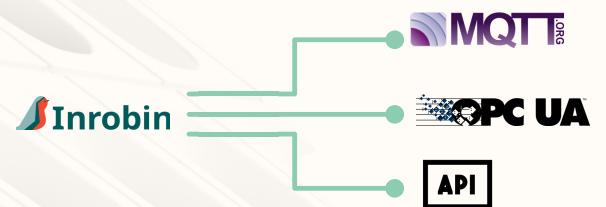

# How it works?

## Get in touch!

If you are an insurer, broker or agent, get in touch and we will explore together ways of collaboration to bring your organization at the forefront of IIoT Insurances.

## IIoT technology

We aim at being at intersection between industry and insurance, and for that reason we will be able to offer a wide spectrum of connectivity. To say: MQTT, OPC UA, OPC DA, Modbus, BACnet, Ethernet IP, Allen Bradley and MT Connect.

## How to find us

Send us an email to [hello@inrobin.com](mailto:hello@inrobin.com) and we will schedule a call with your insurance or engineering team.
